The Aegean

Located between the Greek peninsula and Asia Minor, the Aegean region is abundant with ancient history, a labyrinth of islands and a fascinating blend of East and West.

A cruise around the Aegean islands offers a rugged coastline as well as beautiful bays with dunes, golden beaches and natural harbours, quaint villages and the typical white-washed houses with colourful windows.

The famous Cyclades islands comprise around 220 islands of which only 24 are inhabited. Less popular than the Cyclades and with a different style, the Dodecanese islands stand out for their medieval architecture and peaceful beaches.

With its white cubic houses, the island offers a charming mix of Dodecanese and Cyclades styles. The capital of the island Chora is a picturesque village built along the slopes of a hill. The Medieval fortress on top of the hill creates a very romantic atmosphere at night.
